Montana Fish, Wildlife & Parks

Montana FWP Five Year Stocking Plan

-Program is a computer database that tracks proposed FWP fish stocking for next five years.

-This process was originally designed to help hatchery managers plan egg production and broodfish requirements.

-The plan was designed for a five year period because it is difficult to predict stocking needs beyond this length of time with any certainty (i.e. why 5 instead of 10 yr. Plan?)

-Plan is updated annually by fishery and hatchery managers with review by Hatchery Bureau Chief, Management Bureau Chief, and Fisheries Division Administrator.

-Annual Updates are done via changes made to a computer printout with an attached memo from regional fisheries manager justifying changes. These proposed changes are reviewed as explained above.

-Periodic updates throughout the year are accomplished throughout the year through a designed form, with the same level of review as for annual updates.

-Periodic updates are in response to low water, winter/summer kill, new waters acquired, drought, prolonged flooding, illegal introduction, changes in management needs after an evaluation, etc.

G023 - Garrison NFH, ND
P023 - Gavins Point
V023 - Valley City NFH, ND

CATFISH - 024
P024 - Gavins Point NFH, SD

SMALLMOUTH BASS - 073
I073 - Illinois
M073 - Miles City NFH
U073 - Utah
Y073 - Yankton S.D.

WALLEYE - 082
A082 - Tongue River
C082 - Cooney Reservoir
F082 - Fort Peck
G082 - Garrison/Yellowstone
I082 - Intake
M082 - Mix of Strains from Miles City
N082 - North Dakota
P082 - Gavins Point
S082 - South Dakota
T082 - Tiber Reservoir
Y082 - Yellowtail Reservoir

MOUNTAIN WHITEFISH - 085
A085 - Hungry Horse Res.-Hungry Horse Cr.

CHINOOK SALMON - 087
M087 - Lake Michigan
N087 - North Dakota
S087 - South Dakota

CISCO - 125
C125 - Canada

ATLANTIC SALMON - 126
P126 - Penobscott, ME

SPOTTAIL SHINER - 145
W145 - Lake Winnibigoshish, MN

MUSKIE X N PIKE (TIGER MUSKIE) - 148
F148 - Fort Peck
P148 - Pennsylvania
W148 - Wisconsin

MISCELLANEOUS SPECIES
020 - Yellow Perch
021 - Crappie
026 - Burbot
030 - Goldfish
041 - Northern Redbelly Dace
043 - Silver Plains Minnow
045 - Lake Chub
052 - Flathead Minnow
077 - Black Crappie
078 - White Crappie
150 - Golden X Rb X Cutt
152 - Sunfish Hybrid

HATCHERY CODES

NUMBER FOR DISTRIBUTION REPORTS	HATCHERY OR STATION	CITY

98	MONTANA PRIVATE HATCHERY	
99	TRANSPLANT FROM LAKE/STREAM	
00	STATION UNKNOWN	

SPECIAL DISTRIBUTION WATER CODES

Shipment Out-of-State ------	00 0000
Indian Reservation Plant ---	00 0015
Public Display Pond ------	00 0050
Used for Research ----------	00 0096
Yellowstone Park Plant -----	00 0100
Glacier Park Plant ---------	00 0200

Transfer to individual hatchery, e.g., a transfer to Arlee would appear TO 0002.

In transplanting fish, enter the name and code number of the water stocked in the usual manner, but do not code the name of the water from which the fish came. Write 'Transplant' in the space used for the name of the station, and enter '99' in boxes for the station code number.

In transferring fish from one hatchery to another, code the station from which the fish originated with the normal code. Code the station to which the fish were transferred in the space for the code of the water stocked. Enter "TO" as the Drainage Code.

As a rule-of-thumb, fish planted in a stream to benefit a lake will be coded as planted in the lake if planted within 500 feet of it. If planted 500 feet or more from the lake the stream code will be used.
